

# Come Together.

Invitation to Communicative and Cross-divisional Collaboration for Teams from Companies.

For all AUKOM topics from Metrology, Construction, Development and Production.

## Come Together.

The **Come Together** series is aimed at metrologists, designers and production engineers as well as all those, who would like to know more about AUKOM topics. It is offered for the AUKOM seminars **GD & T** and **Surf** (surface metrology).

**Come Together** establishes the professional knowledge of measurement results within the company on a common, stable and technically competent level. The communication and process flow is decisively improved, saving time and costs.

With **Come Together** we offer you the conditions and the space for common understanding, communication, exchange of experience and coordinated knowledge.

Come as a small team to our partners and learn together with teams from other companies.

Exchange your experiences profitably. The new contacts gained can continue to be beneficial after the seminar. AUKOM trainers are also pleased to come to your company's premises.

**Come Together.**

AUKOM Seminar

**Worldwide Comparable Measurement Results**  
Global Training Standard in Production Metrology

# Worldwide Comparable Measurement Results

Global Training Standard in Production Metrology

## Globally successful

Our success is based on more than 50,000 qualifications completed. Do something for your future and join the AUKOM standard.

## Competitive edge in expertise

Two pillars provide stability. AUKOM seminars are a perfect supplement of device-specific training. Advanced, standardized metrology knowledge increases the reliability of your measurement results and facilitates the decision-making process.

## AUKOM e.V.

AUKOM seminars are the basis for cutting time and costs by providing worldwide comparable measurement results. They are the industrial standard in production metrology.
